

New Topic: Read from file

Mr. Neat
Java

How do we get info
into our
programs now?

Remember EasyReader...
its your friend

```
EasyReader infile;  
infile = new EasyReader("data.txt");
```

this is new!

data.txt

This is a
story about
a.....

```
System.out.print(infile.readWord());
```

data.txt

This is a
story about
a

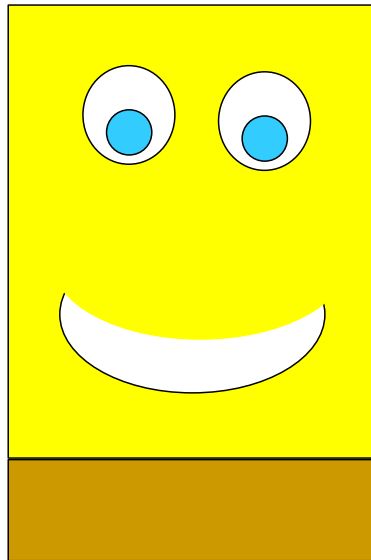

```
System.out.print(infile.readWord());  
System.out.print(infile.readWord());  
System.out.print(infile.readWord());  
System.out.print(infile.readWord());  
System.out.print(infile.readWord());  
System.out.print(infile.readWord());
```

`infile.eof()`

Boolean that returns true
when the end-of-file is
reached

Next Lab

1) count how many times the word “whale” occurs in the book Moby Dick.

Any ?'s
